

Suzhou Novartis Pharma Technology Co.,Ltd

**Novartis HUA Project**

**Letter of Thanks**

To : **Siemens Industrial Automation Ltd. Shanghai (SIAS)**

On 28-Jun 2010, the automation system for the Solvent Recovery plant at the Novartis HUA Project was handed over to their Operational Team and this now successfully completes the automation scope for the project.

This facility is Novartis's first GMP API plant in China and there was a steep learning curve to be overcome by all to ensure the automation system complied with both Novartis and the international standards required for such GxP systems. Siemens proved to be adaptable and willing to learn and as a result the automation system was successfully audited by the Novartis GQA Dept earlier this year and you will be pleased to hear, a later FDA audit of the whole plant in May has resulted in very positive feedback..

We would like to take this opportunity to thank the following key members of the team for their efforts during this project and wish them well for the future:

Project Director:	Abram Ziegelaar:
Project Manager:	Dong Bangbing,
Validation Manager:	Lin Hong:
CSV Technical Expert:	Henk Man,
PCS7 Technical Expert:	Xu Ling & Song Jianping,
Leader Engineer	Fan Dafei,
Engineers	Dai Ye, Wu Licheng, Yan Chumming, Lee Wei, Zhao Shide, Xiang Yang, Lu Yiming, Shi Hao, Wang Yingfeng, Jiang Xiaolei, Chen Keping, Hu Sen,
Document Admin	Chen Cuiping, Lu Sixin.
